VISUAL

The screenshot shows a Visual Studio Code interface with a dark theme. On the left, the Explorer sidebar shows a folder named 'FLASK_PRACTICA_07'. The main area is a PowerShell terminal window titled 'powershell x'. The terminal shows the execution of the command `python -m pip install flask` in a PowerShell prompt. The output indicates that Flask is being installed to the user's site-packages directory and lists several dependencies that are already satisfied, including blinker, click, itsdangerous, Jinja2, MarkupSafe, Werkzeug, and colorama. A notice at the bottom of the terminal suggests upgrading pip from version 25.3 to 26.0.1.

```
